CERTIFIED FEDERAL SUPPLIER VERIFIED VENDOR

WHAT WE DO:

- Legacy System Modernization
- ASP.NET Development
- Microsoft Stack Expertise
- Federal IT Solutions
- Cloud Migration
- Cloud Native
- FedRAMP Compliance
- Agile Development and DevSecOps
- Cybersecurity and Compliance
- Section 508 Compliance
- Azure Government Cloud
- .NET Core
- C# Programming
- IT System Retirement
- Data Migration
- User-Centered Design
- Application Modernization
- IT Security Compliance
- Accessibility Standards
- Cloud Solutions
- Microsoft Azure Services
- JavaScript/TypeScript
- API Development and Integration
- API Management
- API Security
- Microservices Architecture
- Full-Stack Development
- Mobile Application Development
- Serverless Architecture
- AI and Machine Learning Solutions

- Business Intelligence and Analytics
- Enterprise Resource Planning (ERP) Solutions
- DevOps Automation
- SaaS (Software as a Service) Development
- Virtualization and Containerization
- Data Warehousing Solutions
- Blockchain Development
- IoT (Internet of Things) Solutions
- Robotic Process Automation (RPA) Integration
- Continuous Integration
- Continuous Deployment

WHO WE ARE:

- At **PROGRADE TECH LABS LLC**, we specialize in software development with a data-driven approach. With over 12 years of experience in Software Engineering and Systems Design, we ensure that each solution is optimized for performance and tailored to your business's unique needs. Our custom-built applications—whether for mobile, web, or desktop—are designed to deliver seamless functionality and exceptional performance across all platforms.

- We excel at modernizing federal IT systems with seamless integration and minimal downtime. We thrive on tackling complex challenges with innovative, out-of-the-box solutions, ensuring your solutions stay at the forefront of innovation.

- Our expert team, with extensive knowledge of the Microsoft stack, delivers sophisticated and scalable solutions using the latest Microsoft technologies. We emphasize sustainability by employing efficient coding practices that reduce digital footprint and improve longevity.

- We integrate RPA (Robotic Process Automation) to streamline routine tasks, enhancing efficiency and enabling human talent to focus on strategic initiatives. Our real-time monitoring solutions ensure optimal application performance under all conditions, allowing immediate troubleshooting and adjustments.

- We embed security into every software layer, ensuring data protection and peace of mind. We enhance performance and compliance by transitioning systems to secure cloud environments like Microsoft Azure. Our stringent cybersecurity measures safeguard data integrity and ensure adherence to industry standards.

- We are committed to quality and timeliness, accelerating development to deliver robust software on schedule every time. Our service extends beyond delivery with ongoing maintenance, updates, and improvements. We collaborate closely with you to ensure the final product aligns perfectly with your vision and goals.
